Feeding Development is a campaign hosted by Devex that looks at how we can reimagine solutions for a food-secure future. As a co-sponsor for the campaign, Chemonics held a week-long Digital Rally event and posed a series of targeted questions on social media asking people to reflect on the broad issue of ending hunger. What did the conversation look like? Check out the results below!

WHERE WILL THE SOLUTIONS TO END GLOBAL HUNGER COME FROM?

- 72% From beneficiaries, donor governments, private sector, universities, and public-private partnerships
- 24% From public-private partnerships
- 3% From universities
- 3% From the private sector

The solutions are interlinked, no one solution can unlock the success in this fight, partnerships are key.

WHICH OF THE FOLLOWING ACTIVITIES WOULD YOU PARTICIPATE IN TO HELP END GLOBAL HUNGER?

- 24% Volunteer
- 24% Donate money
- 19% Other
- 24% Engage government representatives
- 10% Organize grassroots/community outreach

WHAT IS THE BIGGEST OPPORTUNITY FOR ENDING HUNGER?

- 39% Technology and innovation
- 24% Increased access to finance
- 24% Improved infrastructure and transport
- 19% New laws and regulations
- 10% Self-sustainability at the local level
- 3% Women’s empowerment

WHAT IS THE BIGGEST CHALLENGE TO ENDING HUNGER?

- 39% Lack of investment in climate/agriculture
- 24% Poverty
- 24% Unstable markets
- 19% Food wastage
- 10% War and displacement
- 3% Climate and weather

DO YOU THINK WE CAN END GLOBAL HUNGER BY 2050?

- 55% Yes
- 45% No

First and foremost is access to water, crops won’t survive without it. Secondly innovative techniques and products which enhance sustainable farming methods (in addition to technology, drought tolerant (non-GMO) organic growing mediums).
