## SECTION A. BACKGROUND, SCOPE OF WORK, DELIVERABLES

### A.1. BACKGROUND

The overarching purpose of this Indefinite Quantity Subcontract is to rapidly and responsively procure Malaria Pharmaceutical and Long Lasting Insecticide Treated Nets Commodity Lab Testing services from organizations in support of the Global Health Supply Chain – Procurement and Supply Management (GHSC-PSM) Project.

The Global Health Supply Chain - Procurement and Supply Management (GHSC-PSM) is an official project of the United States Agency for International Development (USAID) implemented by Chemonics International and its consortium members. The purpose of GHSC- PSM is to ensure uninterrupted supplies of health commodities in support of USG-funded public health initiatives around the world.

The project provides direct procurement and supply chain management support to the President's Emergency Plan for AIDS Relief (PEPFAR), the President's Malaria Initiative (PMI), and Population and Reproductive Health (PRH). GHSC-PSM supports health programs through the supply of a wide range of health commodities, including contraceptives and condoms, essential drugs; and select commodities for HIV/AIDS, malaria, maternal and child health, and infectious diseases.

The President's Malaria Initiative (PMI) is a core component of the Global Health Initiative (GHI), along with HIV/AIDS, and tuberculosis. The PMI was launched in June 2005 as a 5- year, \$1.2 billion initiative to rapidly scale up malaria prevention and treatment interventions and reduce malaria-related mortality by 50% in 15 high-burden countries in sub-Saharan Africa.

PMI now works in 19 African focused countries and the Greater Mekong sub-region. The PMI is a joint initiative operationally led by the U.S. Agency for International Development (USAID) and Centers for Disease Control and Prevention (CDC).

While taking into account the achievements from 2001-2013, the PMI strategy for 2015-2020 is to further decrease malaria mortality by 33 percent and malaria morbidity by 40 percent by focusing on five key areas: 1. Achieving and sustaining scale of proven interventions; 2.

Adapting to changing epidemiology and incorporating new tools; 3. Improving countries' capacity to collect and use information; 4. Mitigating risk against the current malaria control gains; 5. Building capacity and health systems. Therefore, the need for quality pharmaceutical products is pivotal for proper treatment.

### A.2. SCOPE OF WORK

The Period of Performance for this IDIQ contract shall be for a one-year period with 1 option year. The subcontractor shall deliver the deliverables set forth in each sub-task order in accordance with the sub-task order schedule.

GHSC-PSM requires testing services from laboratories to perform quality assurance analysis of antimalarials and related pharmaceuticals and long-lasting insecticide treated nets (WHOPES- approved LLINs) procured under GHSC-PSM Task Order 2 (President's Malaria Initiative - PMI). Product testing shall ensure products procured conform to their corresponding quality standards and specifications. Samples shall be collected throughout different points of the supply chain and be delivered to the testing laboratory by PSM or its designated courier.

To reach the objective of this RFP, offerors shall perform the following tasks:

**Perform quality control analysis of malaria pharmaceuticals**

and/or

**Perform quality control analysis of long-lasting insecticide treated nets (WHOPES-approved LLINs)**

For pharmaceuticals, offerors shall perform both physical tests and chemical analyses and/or microbiological tests when appropriate.

Offerors can submit proposals for testing both WHOPES-approved LLINs and pharmaceuticals or only one.

Offerors must demonstrate compliance with the criteria and requirements defined below.

Offerors will be awarded as a primary or a secondary provider (if applicable) of these services. Primary providers will provide these services regularly to PSM, while secondary providers will do this work as a backup to or in support of primary providers. Each time there is an order ready to be tested, the PSM QA team will solicit the selected laboratory for the testing lead time by providing the product and number of batches. The laboratory will then provide the estimated lead time for testing, which will be used as an indicator to measure the performance deliverables two (2) and three (3) set forth in section II.3.

If the laboratory subcontracts the testing, the offering laboratory must provide a list of the subcontracted laboratories and provide the corresponding documentation demonstrating compliance with all of the criteria mentioned below.

To guide offerors, a list of the pharmaceuticals and WHOPES-approved LLINs that will be tested are as follows (note: this list should be used as guidance. It is not an all-encompassing list. PSM reserves the right to request testing services of products that are not included in this list):
