

Getting to (2+6): A Toolkit for Comprehensive and Responsive Numeracy Programs

About the Cover Photo:

Children at a daycare facility run by a women's cooperative in a West Bank refugee camp.

The photo was taken by Steve Sabella of USAID/West Bank/Gaza

Acknowledgements

The toolkit was developed by Chemonics International technical staff, under the direction of Audrey Spencer, Global Practice Lead for Education and Youth at Chemonics International. Stéphane Cyr, mathematics researcher and educator at the University of Québec in Montréal and co-holder of the UNESCO chair in curriculum development, provided valuable technical oversight throughout the development process. Norma Evans, of Evans and Associates Educational Consulting, provided critical technical guidance, research, quality assurance, support, and mentoring throughout the development process.

We would like to acknowledge the inputs of the contributors from Chemonics International — Andrea Bosch, Kathryn Camp, Jennifer Swift-Morgan, Patrick Mroz-Dawes, Faiziddin Niyozov, Alphonse Ntirenganya, Caitlin Vaka, and Joelle Boxer — and thank them for their commitment to producing a quality document. Special thanks to Anna Kuipers for graphic design and Danae Barnes and Laurie Chamberlain for editing, as well as Victoria Cooper and Anna Slother, who have championed resources for toolkit development. We deeply appreciate the collaboration with the team implementing the USAID Tajikistan Learn Together Activity for their collaboration in testing instructional models, teaching techniques, and teacher support tools as part of the package for implementing structured pedagogy in mathematics.

Rights and Permissions

We encourage organizations to use this toolkit as guidance in their efforts to serve local partners in the design of efficient and effective numeracy programs for young learners. This document will be updated as we receive feedback and learn from organizations' experiences implementing this tool.

Please send feedback to EducationandYouthteam@chemonics.com in order to help us improve the toolkit.
