

CONNECT TO WIFI AT CHEMONICS-WASHINGTON

Chemonics-owned Windows computers

Chemonics-owned Windows computers should connect automatically to the WiFi in the building. If your computer does not automatically join the WiFi or has no internet access:

1. Click on the Network & Internet Settings icon on your laptop.
2. Select the Chemonics wireless network and click Disconnect (if it is available). Click Connect.

USERNAME & PASSWORD

Use your Chemonics username and password if prompted. Visit <https://passwordreset.microsoftonline.com> to reset your password.

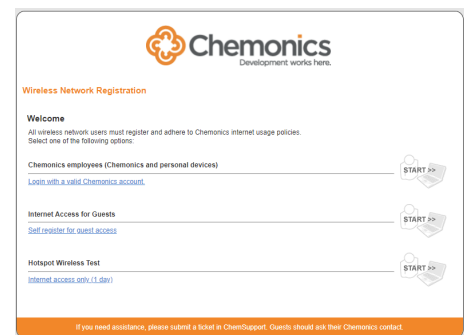

NO INTERNET ACCESS?

If your WiFi drops as you move around the office or you have no internet access, disconnect from the network and reconnect.

Macs, iPhones, and Non-Chemonics Devices

For MacOS computers, iPhones, and any devices not owned and managed by Chemonics:

1. From your device, select the Chemonics wireless network.
2. On most devices, you will be automatically directed to the Chemonics Wireless Network Registration page. If you are not automatically directed, enter <https://chq-fortinac.chemonics.net/registration>.
3. Click one of the links below and follow the on-screen instructions.
 - **Chemonics Employees** – Login with your Chemonics username and password.
 - **Internet Access for Guests** – Register and login if you need to access the internet and share your screen in a meeting room.
 - **Internet Only**– Click the link for one day of internet access.

5G IPHONES

5G compatible iPhones may need the Low Data Mode setting. Go to Settings > Wi-Fi. Tap the info button next to the Wi-Fi network and tap Low Data Mode or Use Wi-Fi for Internet.

Submit a ticket in [ChemSupport](#) with any questions.
