Section I. Instructions to Offerors

I.1. Introduction

Chemonics, the Buyer, acting on behalf of the U.S. Agency for International Development (USAID) and the USAID Global Health Supply Chain Program-Procurement and Supply Management (GHSC-PSM) project under Prime Contract number AID-OAA-I-15-00004, Task Order 01 No. AID-OAA-TO-15-00007, is soliciting offers from companies and organizations to submit proposals for development, configuration, and deployment of a Supplier Performance Management Tool for the Botswana Central Medical Stores (CMS).

The goal of the GHSC-PSM is to ensure uninterrupted supplies of health commodities in support of USG-funded public health initiatives around the world and provide systems strengthening technical assistance to improve supply chain management and commodity security in partner countries. The project anticipates a need for providing a support to the CMS regarding the development, configuration, and deployment of Digital Contract and Supplier Relationship Management (eCSRMS) System. However, the phase 1 of this project focuses on the Supplier Performance Management for the Central Medical Unit of the CMS.

Under the leadership of the Ministry of Health (MoH), CMS is a government entity that procures, stores, and distributes health commodities (medicines, supplies, and laboratory reagents and consumables) for all health facilities (hospitals, clinics, and health posts) in the public sector. While the warehousing and distribution of health commodities is outsourced to a third-party logistics service (3PL) provider, procurement (including the contract management function) remains to be one of the key responsibilities of CMS. The CMS is responsible for managing close to 400 procurement contracts a year.

Both procurement and contract management processes are currently implemented using manual paper-based processes, which puts tremendous workload on the limited human resources. As a result, GHSC-PSM is supporting the CMS to automate some of the contract management processes with the aim of reducing workload, improving efficiency and overall performance. While the emphasis is on digitizing the contract management function, a phased implementation approach has been identified to allow for system scale up and expansion as needed in the future. This RFP covers the processes that either fall under 'purchase order/procurement management' or processes that link the two functions. The procurement of the RFP focused on the operation of supplier performance management. Detailed business process flow diagram of the contract management and supplier performance management is enclosed as Attachment 5 of this RFP.

Offerors are invited to submit proposals in response to this RFP in accordance with **Section I Instructions to Offerors**, which will not be part of the subcontract. The instructions are intended to assist interested Offerors in the preparation of their offer. Any resulting subcontract will be guided by Sections II and III.

This RFP does not obligate Chemonics to execute a subcontract, nor does it commit Chemonics to pay any costs incurred in the preparation and submission of the proposals. Furthermore, Chemonics reserves the right to reject any and all offers, if such action is considered to be in the best interest of Chemonics.

Unless otherwise stated, the periods named in the RFP shall be consecutive calendar days.

I.8 Evaluation and Basis for Award

This RFP will use the tradeoff process to determine best value as set forth in FAR 15.101-1. That means that each proposal will be evaluated and scored against the evaluation criteria and evaluation sub-criteria, which are stated in the table below. Chemonics will award a subcontract to the offeror whose proposal represents the best value to Chemonics and the GHSC-PSM project. Chemonics may award to a higher

priced offeror if a determination is made that the higher technical evaluation of that offeror merits the additional cost/price.

Evaluation points will not be awarded for cost, but for overall evaluation purposes of this RFP, technical evaluation factors other than cost, when combined, are considered significantly more important than cost factors. Cost will primarily be evaluated for realism and reasonableness. If technical scores are determined to be nearly equal, cost will become the determining factor.

Section II Background, Scope of Work, Deliverables, and Deliverables Schedule

II.1. Background

In April 2015, USAID announced a new approach to purchasing and distributing life-saving medicine and health supplies funded through its USAID Global Health programs in support of HIV/AIDS, Malaria, and Reproductive Health. USAID awarded the Global Health Supply Chain Program– Procurement and Supply Management project (GHSC-PSM) to Chemonics International as the lead contractor. An official program of USAID, GHSC-PSM’s goal is to ensure uninterrupted supplies of health commodities in support of United States Government (USG)-funded public health initiatives around the world, Botswana. Chemonics Botswana LLC is implementing GHSC-PSM in Botswana.

The GHSC-PSM Botswana will engage the services of a contractor with expertise in development of Supply Performance Management system for the Botswana Central Medical Stores (a government entity that procures, stores, and distributes health commodities throughout all health facilities within the public sector in Botswana. The procurement of the RFP is focused on the operation of supplier performance management. Detailed business process flow diagram of the contract management and supplier performance management is enclosed as Attachment 5 of this RFP.

Long-Term Scope of User Requirements (Long-Term SOUR) for Digital Contract and Supplier Relationship Management (eCSRM) System

Introduction

This section outlines the long-term set user requirements for development, configuration, and deployment of Digital Contract and Supplier Relationship Management (eCSRM) System for the Botswana Central Medical Stores (CMS).

Under the leadership of the Ministry of Health (MoH), CMS is a government entity that procures, stores, and distributes health commodities (medicines, supplies, and laboratory reagents and consumables) for all health facilities (hospitals, clinics, and health posts) in the public sector. While the warehousing and distribution of health commodities is outsourced to a third-party logistics service (3PL) provider, procurement remains to be one of the key responsibilities of CMS. The procurement function also entails contract management; and CMS is responsible for managing close to 400 procurement contracts each year which cover approximately 2,080-line items of health commodities.

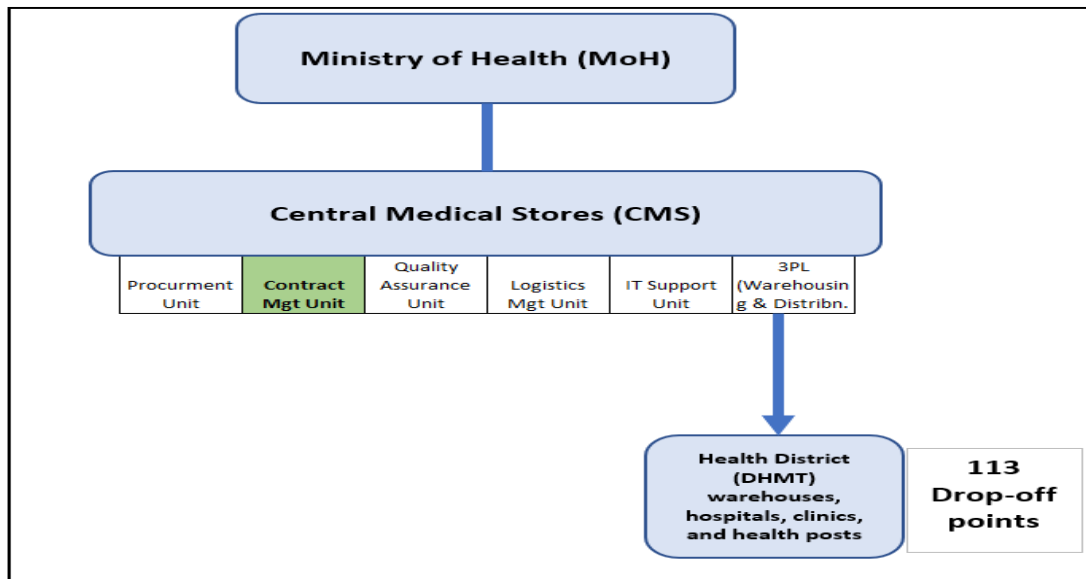

Fig 01: Botswana Central Medical Stores (CMS) structure, March 2023

Both procurement and contract management processes are implemented using manual paper-based processes, and this puts tremendous workload on the limited human resources. As a result, GHSC-PSM is supporting the Botswana CMS to automate some of the contract and supplier management processes with the aim of reducing workload, improving efficiency and overall performance. While the emphasis is on digitizing the contract and supplier management functions, there may be an overlap with the procurement and purchase order management processes; and the user requirement covers some processes that either fall under “procurement or purchase order management” or processes that link the two functions.

The specifications in this section list the general requirements of the entire proposed phased system, and the scope and requirements for the RFP are limited to a first phase of implementation.

Process of Contract Management at Botswana CMS

CMS manages approximately 2,080-line items of health commodities. The CMS Contract Management Unit (CMU) is a team of two permanent staff, two interns, and one technical advisor seconded by GHSC-PSM. The CMU team manages all contracts for health commodities’ procurement as well as the contract for the third-party logistics service provider for warehousing and distribution of health commodities. CMU works very closely with the Procurement Unit (PU); and the initial steps of preparation and submission of tender documents to the MoH is managed by the latter. Vetting of tender documents, advertising, evaluation, selection, and award of contract are all the responsibilities of the MoH (outside CMS). As such, this document does not cover tendering in the scope of requirements.

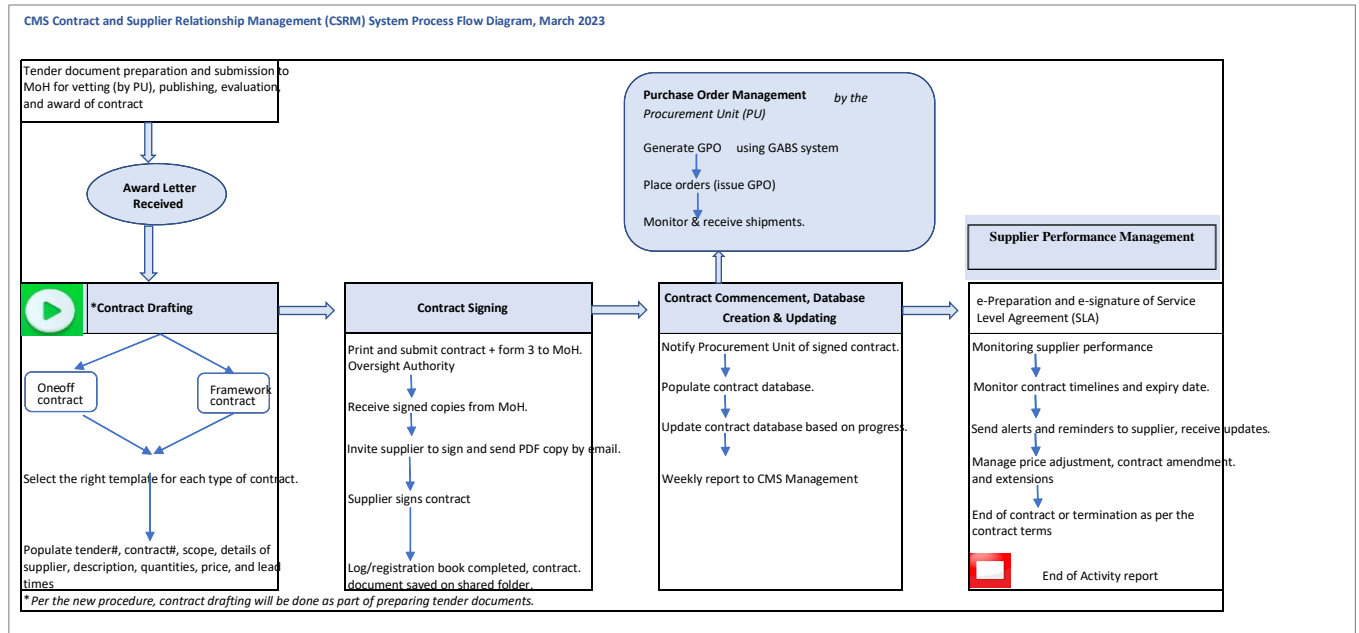

The responsibility of CMU starts after an award letter is issued by the MoH; and the initial activity of CMS/CMU is to draft a contract (*Currently, CMS is working to institute new standard operating procedures, and contract drafting will be done as part of preparing tender documents*). There are mainly two types of contracts based on the nature of the procurement – 1) one-off contract; 2) framework contract. There are several types of procurement selection procedures for “one-off contracts”: (a) emergency procurement, (b) micro-procurement, (c) Quotation Proposal Procurements (QPP), (d) direct procurements, and (e) waivers. Framework contracts are quite different from the other procurements as they cover multiple years with a supplier at fixed price for supply of a specified list of health commodities. The framework

contracts are umbrella agreements which enable the CMS/CMU to issue individual purchase orders for specific quantities of defined health commodities according to the fixed prices. For example, a 3-year framework contract could be implemented with 4-8 purchase orders.

Currently the CMU prepares the contract document, but in the future, it will be the Procurement Unit (PU) who prepares the contract document by adding details of the tender number, contract number, supplier information, description of item to be procured, quantities, price, and lead times (delivery times).

Following drafting of a contract, the CMS/CMU submits it for signing by the MoH Oversight Authority. CMS/CMU sends a soft copy of the contract signed by MoH to the awardee and invites the latter to sign the contract document in person at the CMS premises. After the contract is signed by the awardee, a registration book is completed, and the signed contract document is scanned and saved on a shared folder. CMS/CMU notifies the PU of the signed contract. The PU prepares Government Purchase Order (GPO) or Letter of Commitment (LOC) and issues to the awardee (supplier). The GPO is generated using an electronic financial information system called GABS (Government Accounting and Budgeting System) while the LOC is prepared manually.

CMS/CMU populates an excel-based contract database with details of the awardee, contract, line items included in the contract, duration of contract, delivery timelines, and other details included in Annex to the RFP. CMS/CMU monitors and prepares weekly reports to the CMS management on the progress of contracts.

The PU is responsible for continuous communication with the supplier and monitoring of shipments. Updates on status of shipments is provided by the supplier using email communications and telephone calls. Once shipments are delivered at CMS, the goods receipts information is recorded into the electronic GABS. It is also recorded manually into an excel template by the 3PL for daily reporting and sharing of information with the entire CMS staff. The same information is recorded into the Warehouse Management System

(WMS) provided by PULSE Logistics Systems (commonly called “Pulse”), and the information is used for managing inventory and distribution of the health commodities.

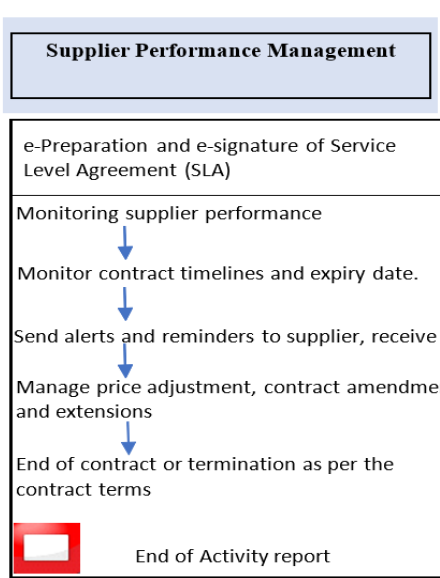

While the purchase order management is the primary duty of the PU, the CMU is responsible for managing supplier performance. CMU monitors contract timelines and expiry dates, sends alerts and reminders to the supplier, and receives updates. CMU also manages price adjustments, contract amendment, extension, and termination. At the end of a contract life cycle, the CMU prepares and shares end of activity report with the CMS management.

II.2. Scope of Work for this RFP

Following this RFP, Chemonics anticipates awarding one Fixed Price Subcontract.

1.1	<p>Contract document drafting</p> <p>The system should have options for selecting a template for drafting both one-off contract and framework contract. There should be field options to populate the tender number, contract number, description of item, quantities, price, and lead times. The contract draft generated by the system should be similar to the manual contract currently being used by CMS (Annex 8).</p>	1
1.2	<p>Contract e-Signing, document sharing, and e-filing</p> <p>Once the contract document is generated, the system should be able to share the document for e-signature by the MoH which is external to CMS. Limited user access shall be given to the</p>	1

Requirement ID	Requirement Description	Priority for RFP Purposes
	<p>MoH for e-signature of the contract. Once the document e signed by MoH the CMS users will send a PDF copy to the supplier for review and schedule an appointment for signing the contract in person at CMS. Contractual remedies may apply unless Chemonics concurs with the documented impracticality of registration.

Failure to comply with the reporting requirements in a timely manner as required under this section may constitute a material breach of the Subcontract and cause for withholding payment to the Subcontractor until the required information has been supplied to Chemonics or the Subcontractor demonstrates to Chemonics that its System for Award Management record has been updated. In addition to contractual remedies, Chemonics may make the Subcontractor's failure to comply with the reporting requirements a part of the Subcontractor's performance information record.

Annex 2 Guide to Creating a Financial Proposal for a Fixed Price Subcontract

The purpose of this annex is to guide offerors in creating a budget for their cost proposal. Because the subcontract will be funded under a United States government-funded project, it is important that all offerors' budgets conform to this standard format. It is thus strongly recommended that offerors follow the steps described below.

Under no circumstances may cost information be included in the technical proposal. No cost information or any prices, whether for deliverables or line items, may be included in the technical proposal. Cost information must only be shown in the cost proposal.

Step 1: Design the technical proposal. Offerors should examine the market for the proposed activity and realistically assess how they can meet the needs as described in this RFP, specifically in section II. Offerors should present and describe this assessment in their technical proposals.

Step 2: Determine the basic costs associated with each deliverable. Offerors should consider best estimate of the costs associated with each deliverable, which should include labor and all non-labor costs, e.g. other direct costs, such as fringe, allowances, travel and transport, etc.

Step 3: Create a budget for the cost proposal. Each offeror must create a budget using a spreadsheet program compatible with MS Excel. The budget period should follow the technical proposal period. A sample budget is shown on the following page. All items and services must be clearly labeled and include the total offered price. The detailed budget must show major line items, including, for example:

1. Salaries
2. Indirect costs
3. Any other costs applicable to the work
4. DBA – see clause I. 11

All cost information must be expressed in BWP.

Step 4: Write Budget Narrative. The spreadsheets shall be accompanied by written notes in MS Word that explain each cost line item and the assumption why a cost is being budgeted as well as how the amount is reasonable. Supporting information must be provided in sufficient detail to allow for a complete analysis of each cost element or line item. Chemonics reserves the right to request additional cost information if the evaluation committee has concerns of the reasonableness, realism, or completeness of an offeror's proposed cost.

If it is an offeror's regular practice to budget indirect rates, e.g. overhead, fringe, G&A, administrative, or other rate, Offerors must explain the rates and the rates' base of application in the budget narrative. Chemonics reserves the right to request additional information to substantiate an Offeror's indirect rates.

Sample Budget

Offerors should revise the budget line items accordingly in response to the technical and cost requirements of this RFP.

UEI and SAM Registration Guidance

What is an UEI Number?

The Unique Entity Identifier, or the UEI, is the official name of the “new, non-proprietary identifier” that will replace the DUNS number. The UEI will be requested in, and assigned by, the System for Award Management (SAM.gov). Businesses and organizations who receive funding from the US government will have to use a Unique Entity Identifier (UEI) created in SAM.gov. The UEI number helps the USG to identify companies.

Why am I being requested to obtain a UEI number?

U.S. law – in particular the Federal Funding Accountability and Transparency Act of 2006 (Pub.L. 109-282), as amended by section 6202 of the Government Funding Transparency Act of 2008 (Pub.L. 110-252) - make it a requirement for all entities doing business with the U.S. Government to be registered, currently through the System for Award Management, a single, free, publicly- searchable website that includes information on each federal award. As part of this reporting requirement, prime contractors such as Chemonics must report information on qualifying subawards as outlined in FAR 52.204-10 and 2CFR Part 170. Chemonics is required to report subcontracts with an award valued at greater than or equal to \$30,000 under a prime contract and subawards under prime grants or prime cooperative agreements obligating funds of \$25,000 or more, whether U.S. or locally based. Because the U.S. Government uses UEI numbers to uniquely identify businesses and organizations, Chemonics is required to enter subaward data with a corresponding UEI number.

Is there a charge for obtaining a UEI number?

No. Obtaining a UEI number is absolutely free for all entities doing business with the Federal government. This includes current and prospective contractors, grantees, and loan recipients.

How do I obtain a UEI number?

UEI numbers can be obtained online at SAM.gov.

What information will I need to obtain a UEI number?

To request a UEI number, you will need to provide the following information:

- Legal name and structure
- Tradestyle, Doing Business As (DBA), or other name by which your organization is commonly recognized
- Physical address, city, state and Zip Code
- Mailing address (if separate)
- Telephone number
- Contact name
- Number of employees at your location
- Description of operations and associated code (SIC code found at <https://www.osha.gov/pls/imis/sicsearch.html>)

- Annual sales and revenue information
- Headquarters name and address (if there is a reporting relationship to a parent corporate entity)

How long does it take to obtain a UEI number?

The UEI number is issued immediately upon completion of the request process.

Are there exemptions to the UEI number requirement?

There may be exemptions under specific prime contracts, based on an organization's previous fiscal year income when selected for a subcontract award, or Chemonics may agree that registration is impractical in certain situations. Organizations may discuss these options with the Chemonics representative.

What is CCR/SAM?

Central Contractor Registration (CCR)—which collected, validated, stored and disseminated data in support of agency acquisition and award missions—was consolidated with other federal systems into the System for Award Management (SAM). SAM is an official, free, U.S. government-operated website. There is NO charge to register or maintain your entity registration record in SAM.

When should I register in SAM?

While registration in SAM is not required for organizations receiving a grant under contract, subcontract or cooperative agreement from Chemonics, Chemonics requests that partners register in SAM if the organization meets the following criteria requiring executive compensation reporting in accordance with the FFATA regulations referenced above. SAM.gov registration allows an organization to directly report information and manage their organizational data instead of providing it to Chemonics. Reporting on executive compensation for the five highest paid executives is required for a qualifying subaward if in your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs):

- (1) received 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**
- (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**,
- (3) The public **does not** have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the US Internal Revenue Code of 1986.

If your organization meets the criteria to report executive compensation, the following sections of this document outline the benefits of and process for registration in SAM.gov. Registration may be initiated at <https://www.sam.gov>. There is NO fee to register for this site.

Why should I register in SAM?

Chemonics recommends that partners register in SAM to facilitate their management of organizational data and certifications related to any U.S. federal funding, including required executive compensation reporting. Executive compensation reporting for the five highest paid executives is required in connection with the reporting of a qualifying subaward if:

- a. In your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs) received (1) 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and,
- b. The public have does not have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986.

What benefits do I receive from registering in SAM?

By registering in SAM, you gain the ability to bid on federal government contracts. Your registration does not guarantee your winning a government contract or increasing your level of business. Registration is simply a prerequisite before bidding on a contract. SAM also provides a central storage location for the registrant to supply its information, rather than with each federal agency or prime contractor separately. When information about your business changes, you only need to document the change in one place for every federal government agency to have the most up-to-date information.
