If the liabilities to be set off are expressed in different currencies, Chemonics may convert either liability at a market rate of exchange for the purpose of set-off. Any exercise by Chemonics of its rights under this clause shall not limit or affect any other rights or remedies available to it under this agreement or otherwise.

6. COMPLIANCE WITH LAWS AND POLICIES

- 6.1 Each party shall at its own expense comply with all laws and regulations relating to its activities under this agreement, as they may change from time to time, and with any conditions binding on it in any applicable licences, registrations, permits and approvals. For the avoidance of doubt, nothing in this clause shall prevent the Subcontractor from claiming expenses that are permitted in accordance with Schedule 2.
- 6.2 The Subcontractor shall comply with the Mandatory Policies as Chemonics or the Authority may update them from time to time.

7. PROJECT MANAGEMENT AND SECURITY

- 7.1 The Subcontractor Representative shall co-operate with the Chemonics Representative and shall attend meetings scheduled by the Chemonics Representative at reasonable intervals to advise and assist Chemonics on all matters relating to this agreement.

 - (b) the individual resigns from their engagement with the Subcontractor; or

8. EQUIPMENT OR FACILITIES

8.1 Chemonics will provide or procure the provision of the equipment and facilities specified in Schedule 3 to the Subcontractor.

8.2 The Subcontractor may only use the equipment and facilities specified in Schedule 3 for the sole purpose of delivering the Services and supplying any goods pursuant to this agreement. Personal use of equipment is prohibited.

- (a) the other party fails to pay any amount due under this agreement on the due date for payment and remains in default not less than 30 days after being notified in writing to make such payment;
- (b) the other party commits a material breach of any term of this agreement (other than failure to pay any amounts due under this agreement) and (if such breach is remediable) fails to remedy that breach within a period of 14 days after being notified in writing to do so;
- (c) the other party repeatedly breaches any of the terms of this agreement in such a manner as to reasonably justify the opinion that its conduct is inconsistent with it having the intention or ability to give effect to the terms of this agreement;
- (d) the other party takes any step or action in connection with its entering administration, provisional liquidation or any composition or arrangement with its creditors (other than in relation to a solvent restructuring), being wound up (whether voluntarily or by order of the court, unless for the purpose of a solvent restructuring), having a receiver appointed to any of its assets or ceasing to carry on business or, if the step or action is taken in another jurisdiction, in connection with any analogous procedure in the relevant jurisdiction;

- (e) the other party suspends, or threatens to suspend, or ceases or threatens to cease to carry on all or a substantial part of its business; or
 - (f) the other party's financial position deteriorates to such an extent that in the terminating party's reasonable opinion the other party's capability to adequately fulfil its obligations under the agreement has been placed in jeopardy.
- 10.2 Chemonics may terminate this agreement immediately by notice in writing to the Subcontractor if the Subcontractor is in breach of its obligations under clause 6 or under clauses 18 through to 21 inclusive or if any warranty or representation given by the Subcontractor under or in connection with this agreement is found to be untrue or misleading or if the Subcontractor fails to comply in the performance of this agreement with legal obligations in the fields of environmental, social or labour law.
- 10.3 Chemonics may also terminate this agreement without default at any time on 30 days' notice in writing to the Subcontractor. If Chemonics terminates this agreement without default, Chemonics will reimburse the Subcontractor's unavoidable costs properly and necessarily incurred in connection with the termination of this agreement.
- 10.4 On termination or expiry of this agreement:
- (a) the Subcontractor shall immediately deliver to Chemonics all Deliverables whether or not then complete and return to Chemonics any of Chemonics's and/or the Authority's property and equipment. If the Subcontractor fails to do so, then Chemonics may enter the Subcontractor's premises and take possession of them. Until they have been delivered or returned, the Subcontractor shall be solely responsible for the safe keeping of all Deliverables and Chemonics's and/or the Authority's property and equipment in its possession and will not use them for any purpose not connected with this agreement;
 - (b) the Subcontractor shall immediately stop using any facilities provided to it by Chemonics or the Authority;
 - (c) the Subcontractor shall, if so requested by Chemonics, provide all assistance reasonably required by Chemonics to facilitate the smooth transition of the Services to Chemonics or any replacement supplier appointed by Chemonics; and
 - (d) any provision of this agreement that expressly or by implication is intended to come into or continue in force on or after termination or expiry of this agreement including clause 1, clause 3, clause 4, clauses 9 through to clause 17 inclusive, clauses 24 through to clause 30 inclusive, clauses 32 through to clause 38 inclusive, 0, 0, Schedule 6 and Appendix 1 shall remain in full force and effect.
- 10.5 If Chemonics terminates or suspends this agreement because the Authority has terminated or suspended the Prime Contract under provisions in the Prime Contract that provide for termination "without default of the Supplier" then the Subcontractor shall:
- (a) take such steps as directed by Chemonics to terminate the provision of the Services or any part of the Services in a cost-effective, timely and orderly manner; and
 - (b) provide to Chemonics not more than 40 calendar days after Chemonics notifies the Subcontractor of the suspension or termination of this agreement an account in writing stating:
 - (i) any costs, if any, due before the date of suspension or termination;

- (ii) costs to be expended after the date of suspension or termination which the Subcontractor necessarily incurred in the proper performance of the agreement and which it cannot reasonably be expected to avoid or recover.
- 10.6 Subject to Chemonics's approval, Chemonics shall submit the account referred to in paragraph 10.5 (b) to the Authority together with an invoice for the costs stated in such account.
- 10.7 Chemonics shall transfer to the Subcontractor any payment that it receives from the Authority on account of the costs stated in the report referred to in paragraph 10.6.
- 10.8 Termination or expiry of this agreement shall not affect any rights, remedies, obligations or liabilities of the parties that have accrued up to the date of termination or expiry, including the right to claim damages in respect of any breach of the agreement which existed at or before the date of termination or expiry.

- 11.1 The Subcontractor shall comply with Chemonics' EU data protection policy (<https://chemonics.com/chemonics-eu-data-protection-policy/>) and Applicable Laws when processing personal data relating to any individual in connection with this agreement.
- 11.2 The Subcontractor shall permit Chemonics, the Authority and their representatives to inspect and audit the Subcontractor's data processing activities and comply with all reasonable requests by Chemonics to enable Chemonics and the Authority to verify and/or procure that the Subcontractor is in full compliance with its obligations under this agreement.
- 11.3 Any transfer of personal data from the Subcontractor to Chemonics, that is subject to the EU's General Data Protection Regulation ((EU) 2016/679) and/or the UK's Data Protection Act 2018 shall be made under the Standard Contractual Clauses set out in Schedule 7.

Schedule 1 - Subcontract Scope of Work

1. BACKGROUND

Mobilising Institutional Capital Through Listed Product Structures' (MOBILIST) is a flagship FCDO programme, recently supported by the Norwegian Agency for Development Cooperation (Norad), to mobilise large scale investment flows to emerging market and developing economies (EMDEs) through public markets. Its overarching strategic objective is to address the Sustainable Development Goal (SDG) finance gap by targeting institutional capital through listed product structures.

The MOBILIST programme has two pillars:

- A Product Platform which sources, selects and supports relevant financial institutions through the listing process with equity capital, advisory and technical assistance
- A Research and Policy Platform with supports the EMDE sustainable finance ecosystem through research, monitoring evaluation and learning (MEL), and communications/advocacy.

MOBILIST continues to sponsor an ambitious programme of research to inform and influence market actors, filling knowledge gaps and correcting misperceptions to enhance the volume and efficiency of capital allocated to emerging and frontier markets. Combined with MOBILIST seed capital and technical support for high potential firms and fund managers, MOBILIST's research outputs will help demonstrate the potential of emerging and frontier market listed assets for international portfolios. Ultimately, MOBILIST research will help enhance the flow of capital into assets that contribute to sustainable economic development in emerging and frontier markets, contributing at scale to the SDGs and Climate Finance objectives.

The gap we have identified for this piece of design research surrounds potential innovations in equity indices to capture opportunities for growth and diversification by investing in EMDEs. This piece builds on prior MOBILIST research into information asymmetries affecting asset allocation to emerging and frontier markets and prior MOBILIST analysis of the existing landscape of available market indices. Prior MOBILIST research identified the critical role of market indices in shaping the flow of capital to EMDEs. These indices drive the allocation of passively managed assets and serve as benchmarks against which actively managed funds are measured.

For the first time it takes MOBILIST research into the design of practical new solutions – benchmarks and potentially investment products – with potential to mobilise private capital through listed structures. MOBILIST research highlights challenges facing providers and users of existing equity indices, particularly for the frontier markets. Market participants report issues around concentration, frequent turnover of constituents, and misalignment with allocators' portfolio objectives. The mainstreaming of ESG considerations into market benchmarks has also raised the question of subjectivity in index construction, in turn heightening the attention of regulators across the developed markets.

Despite recent revisions to flagship equity benchmarks, companies listed in developing countries and developing country companies listed internationally remain underrepresented. These are the markets and companies that offer greatest diversification potential for global allocators, as larger emerging markets have become increasingly

integrated into, and so correlated with, the developed markets. As importantly, market capitalisation weighting strategies favour large established companies – often state- or family-owned conglomerates in EMDEs – over those with the most promising growth prospects. Both features mean that established benchmarks fail to capture opportunities for growth and diversification by investing in EMDEs.

Building on prototyping of alternative market indices, MOBILIST is commissioning detailed design, backtesting, and piloting with market participants of new benchmarks and, ultimately, linked investment products. This design research will comprise a landscaping of current indices, analysis of their impact on emerging and frontier market flows, and reflecting learnings into the design and construction of a pilot EMDE-focused index. In addition to alternative inclusion criteria and weighting strategies, index innovations could include indices comprising derivatives of underlying securities, for example to separate currency risk from other drivers of hard currency performance among emerging and frontier market assets. Each new index will be designed for scale and with clear routes to adoption among market participants. In isolation, technically attractive indices that lack support from market participants will have no impact on capital flows.

The design research should result **in a pilot index** that would correct for potential issues with existing indices as they relate to investments in emerging and frontier markets. This solution should include a combination of (i) pilot index construction that is tested with market participants; and (ii) recommendations in relation to ensuring the uptake at scale of the index. MOBILIST's engagement with market participants to date confirms challenges with existing benchmarks, feasibility of alternatives, but also high switching costs that maintain the status quo. By generating a public good in the form of practical research and experimentation that reduces these costs, indices prepared through this project may be able to have systemic impact over time on EMDE capital flows.

2. SCOPE OF WORK

The proposed design research will review the existing indices and asset allocation to emerging and frontier markets. It will build on learnings from these indices and construct one or more index that addresses the risks and opportunities presented in EMDE and propose measures to ensure uptake and make the index commercially viable at scale.

The Tenderer's deliverables should provide current, original, actionable insights on the following Design Questions:

1. **Ideation:** Building from existing prototypes, what alternatives to mainstream benchmarks could increase the flow of capital into EMDEs by better meeting the objectives of managers' and allocators' emerging and frontier market portfolio strategies?
2. **Feasibility:** To what extent are high potential alternative indices feasible with existing data, and where data are missing how could they be collected? To what extent would these alternatives meet investors' demands?
3. **Backtesting:** How do alternative benchmarks perform relative to existing emerging and frontier market indices in the context of (i) dedicated emerging and frontier equity or cross-asset strategies and (ii) globally diversified portfolios? In addition to price and income performance, backtesting would consider volatility, liquidity, correlation with each portfolio and ultimately investability of each proposition.

4. **Piloting:** How do the most promising benchmarks perform in a pilot with one or more market participants? To what extent could these benchmarks augment asset allocation by both global institutional investors and emerging and frontier market portfolio managers?
5. **Scale:** What are the routes to adoption at scale of successful benchmarks?

Progressing through each stage of the design research would be dependent on the supplier's satisfactory performance of the preceding phase.

The Tenderer is expected to design a compelling methodology, which will follow the routine workflow associated with the development of a new market index. Findings would be made publicly available in a series of short briefing notes prepared at the end of each phase. This ensures that the wider market of index providers and investment managers benefits from the proposed design research and is able to build additional benchmarks and investment products based on this learning. The Tenderer will be supported by a Research Advisory Panel of experts from FCDO, from the practitioner community, and from the academic community.

The Final Design Research Report will be made available online on MOBILIST's website and through targeted dissemination with the intended audience at the discretion of MOBILIST and FCDO. The Tenderer will be required to contribute to and/or lead elements of this dissemination strategy. All relevant content produced should be MOBILIST branded and acknowledge FCDO funding. Co-branding or alternative branding requests will be made at the discretion of MOBILIST and FCDO. All core research and external communications materials including media engagements must be approved by MOBILIST's research and communication teams.

- 3.4 If the Authority refuses to pay Chemonics an amount equal to the Subcontractor's fees, costs and expenses properly and necessarily incurred in connection with the performance and termination of any Services then, to the extent that such refusal is due to Chemonics' breach of the Prime Contract, Chemonics will pay such fees, costs and expenses to the Subcontractor without prejudice to any other right or remedy available to the Subcontractor.

establishment)

hereinafter "data exporter"

and

Chemonics Group UK Ltd.

1 Benjamin Street,
Farringdon,
London,
EC1M 5QL

hereinafter "data importer"

each a "party"; together "the parties".

Definitions

For the purposes of the clauses:

- a) “personal data”, “special categories of data/sensitive data”, “process/processing”, “controller”, “processor”, “data subject” and “supervisory authority/authority” shall have the same meaning as in Directive 95/46/EC of 24 October 1995 (whereby “the authority” shall mean the competent data protection authority in the territory in which the data exporter is established);
- b) “the data exporter” shall mean the controller who transfers the personal data;
- c) “the data importer” shall mean the controller who agrees to receive from the data exporter personal data for further processing in accordance with the terms of these clauses and who is not subject to a third country’s system ensuring adequate protection;
- d) “clauses” shall mean these contractual clauses, which are a free-standing document that does not incorporate commercial business terms established by the parties under separate commercial arrangements.

The details of the transfer (as well as the personal data covered) are specified in Annex B, which forms an integral part of the clauses.

I. Obligations of the data exporter

The data exporter warrants and undertakes that:

- a) The personal data have been collected, processed and transferred in accordance with the laws applicable to the data exporter.
- b) It has used reasonable efforts to determine that the data importer is able to satisfy its legal obligations under these clauses.
- c) It will provide the data importer, when so requested, with copies of relevant data protection laws or references to them (where relevant, and not including legal advice) of the country in which the data exporter is established.
- d) It will respond to enquiries from data subjects and the authority concerning processing of the personal data by the data importer, unless the parties have agreed that the data importer will so respond, in which case the data exporter will still respond to the extent reasonably possible and with the information reasonably available to it if the data importer is unwilling or unable to respond. Responses will be made within a reasonable time.
- e) It will make available, upon request, a copy of the clauses to data subjects who are third party beneficiaries under clause III, unless the clauses contain confidential information, in which case it may remove such information. Where information is removed, the data exporter shall inform data subjects in writing of the reason for removal and of their right to draw the removal to the attention of the authority. However, the data exporter shall abide by a decision of the authority regarding access to the full text of the clauses by data subjects, as long as data subjects have agreed to respect the confidentiality of the confidential information removed. The data exporter shall also provide a copy of the clauses to the authority where required.

II. Obligations of the data importer

The data importer warrants and undertakes that:

- a) It will have in place appropriate technical and organisational measures to protect the personal data against accidental or unlawful destruction or accidental loss, alteration, unauthorised disclosure or access, and which provide a level of security appropriate to the risk represented by the processing and the nature of the data to be protected.
- b) It will have in place procedures so that any third party it authorises to have access to the personal data, including processors, will respect and maintain the confidentiality and security of the personal data. Any person acting under the authority of the data importer, including a data processor, shall be obligated to process the personal data only on instructions from the data importer. This provision does not apply to persons authorised or required by law or regulation to have access to the personal data.

- c) It has no reason to believe, at the time of entering into these clauses, in the existence of any local laws that would have a substantial adverse effect on the guarantees provided for under these clauses, and it will inform the data exporter (which will pass such notification on to the authority where required) if it becomes aware of any such laws.
- d) It will process the personal data for purposes described in Annex B, and has the legal authority to give the warranties and fulfil the undertakings set out in these clauses.
- e) It will identify to the data exporter a contact point within its organisation authorised to respond to enquiries concerning processing of the personal data, and will cooperate in good faith with the data exporter, the data subject and the authority concerning all such enquiries within a reasonable time. In case of legal dissolution of the data exporter, or if the parties have so agreed, the data importer will assume responsibility for compliance with the provisions of clause I(e).
- f) At the request of the data exporter, it will provide the data exporter with evidence of financial resources sufficient to fulfil its responsibilities under clause III (which may include insurance coverage).
- g) Upon reasonable request of the data exporter, it will submit its data processing facilities, data files and documentation needed for processing to reviewing, auditing and/or certifying by the data exporter (or any independent or impartial inspection agents or auditors, selected by the data exporter and not reasonably objected to by the data importer) to ascertain compliance with the warranties and undertakings in these clauses, with reasonable notice and during regular business hours. The request will be subject to any necessary consent or approval from a regulatory or supervisory authority within the country of the data importer, which consent or approval the data importer will attempt to obtain in a timely fashion.
- h) It will process the personal data, at its option, in accordance with:
 - i. the data protection laws of the country in which the data exporter is established, or
 - ii. the relevant provisions² of any Commission decision pursuant to Article 25(6) of Directive 95/46/EC, where the data importer complies with the relevant provisions of such an authorisation or decision and is based in a country to which such an authorisation or decision pertains, but is not covered by such authorisation or decision for the purposes of the transfer(s) of the personal data³, or
 - iii. the data processing principles set forth in Annex A.

Data importer to indicate which option it selects: Annex A

Initials of data importer:

.....
;

<Anyone can initial here to confirm we are using "Annex A">

- i) It will not disclose or transfer the personal data to a third party data controller located outside the European Economic Area (EEA) unless it notifies the data exporter about the transfer and
 - i. the third party data controller processes the personal data in accordance with a Commission decision finding that a third country provides adequate protection, or
 - ii. the third party data controller becomes a signatory to these clauses or another data transfer agreement approved by a competent authority in the EU, or

² "Relevant provisions" means those provisions of any authorisation or decision except for the enforcement provisions of any authorisation or decision (which shall be governed by these clauses).

³ However, the provisions of Annex A.5 concerning rights of access, rectification, deletion and objection must be applied when this option is chosen and take precedence over any comparable provisions of the Commission Decision selected.

- iii. data subjects have been given the opportunity to object, after having been informed of the purposes of the transfer, the categories of recipients and the fact that the countries to which data is exported may have different data protection standards, or
- iv. with regard to onward transfers of sensitive data, data subjects have given their unambiguous consent to the onward transfer

III. Liability and third party rights

- a) Each party shall be liable to the other parties for damages it causes by any breach of these clauses. Liability as between the parties is limited to actual damage suffered. Punitive damages (i.e. damages intended to punish a party for its outrageous conduct) are specifically excluded. Each party shall be liable to data subjects for damages it causes by any breach of third party rights under these clauses. This does not affect the liability of the data exporter under its data protection law.
- b) The parties agree that a data subject shall have the right to enforce as a third party beneficiary this clause and clauses I(b), I(d), I(e), II(a), II(c), II(d), II(e), II(h), II(i), III(a), V, VI(d) and VII against the data importer or the data exporter, for their respective breach of their contractual obligations, with regard to his personal data, and accept jurisdiction for this purpose in the data exporter's country of establishment. In cases involving allegations of breach by the data importer, the data subject must first request the data exporter to take appropriate action to enforce his rights against the data importer; if the data exporter does not take such action within a reasonable period (which under normal circumstances would be one month), the data subject may then enforce his rights against the data importer directly. A data subject is entitled to proceed directly against a data exporter that has failed to use reasonable efforts to determine that the data importer is able to satisfy its legal obligations under these clauses (the data exporter shall have the burden to prove that it took reasonable efforts).

IV. Law applicable to the clauses

These clauses shall be governed by the law of the country in which the data exporter is established, with the exception of the laws and regulations relating to processing of the personal data by the data importer under clause II(h), which shall apply only if so selected by the data importer under that clause.

V. Resolution of disputes with data subjects or the authority

- a) In the event of a dispute or claim brought by a data subject or the authority concerning the processing of the personal data against either or both of the parties, the parties will inform each other about any such disputes or claims, and will cooperate with a view to settling them amicably in a timely fashion.
- b) The parties agree to respond to any generally available non-binding mediation procedure initiated by a data subject or by the authority. If they do participate in the proceedings, the parties may elect to do so remotely (such as by telephone or other electronic means). The parties also agree to consider participating in any other arbitration, mediation or other dispute resolution proceedings developed for data protection disputes.
- c) Each party shall abide by a decision of a competent court of the data exporter's country of establishment or of the authority which is final and against which no further appeal is possible.

VI. Termination

- a) In the event that the data importer is in breach of its obligations under these clauses, then the data exporter may temporarily suspend the transfer of personal data to the data importer until the breach is repaired or the contract is terminated.
- b) In the event that:
 - i. the transfer of personal data to the data importer has been temporarily suspended by the data exporter for longer than one month pursuant to paragraph (a);
 - ii. compliance by the data importer with these clauses would put it in breach of its legal or regulatory obligations in the country of import;

- iii. the data importer is in substantial or persistent breach of any warranties or undertakings given by it under these clauses;
- iv. a final decision against which no further appeal is possible of a competent court of the data exporter's country of establishment or of the authority rules that there has been a breach of the clauses by the data importer or the data exporter; or
- v. a petition is presented for the administration or winding up of the data importer, whether in its personal or business capacity, which petition is not dismissed within the applicable period for such dismissal under applicable law; a winding up order is made; a receiver is appointed over any of its assets; a trustee in bankruptcy is appointed, if the data importer is an individual; a company voluntary arrangement is commenced by it; or any equivalent event in any jurisdiction occurs

then the data exporter, without prejudice to any other rights which it may have against the data importer, shall be entitled to terminate these clauses, in which case the authority shall be informed where required. In cases covered by (i), (ii), or (iv) above the data importer may also terminate these clauses.

- c) Either party may terminate these clauses if (i) any Commission positive adequacy decision under Article 25(6) of Directive 95/46/EC (or any superseding text) is issued in relation to the country (or a sector thereof) to which the data is transferred and processed by the data importer, or (ii) Directive 95/46/EC (or any superseding text) becomes directly applicable in such country.
- d) The parties agree that the termination of these clauses at any time, in any circumstances and for whatever reason (except for termination under clause VI(c)) does not exempt them from the obligations and/or conditions under the clauses as regards the processing of the personal data transferred.

VII. Variation of these clauses

The parties may not modify these clauses except to update any information in Annex B, in which case they will inform the authority where required. This does not preclude the parties from adding additional commercial clauses where required.

VIII. Description of the Transfer

The details of the transfer and of the personal data are specified in Annex B. The parties agree that Annex B may contain confidential business information which they will not disclose to third parties, except as required by law or in response to a competent regulatory or government agency, or as required under clause I(e). The parties may execute additional annexes to cover additional transfers, which will be submitted to the authority where required. Annex B may, in the alternative, be drafted to cover multiple transfers.

ANNEX A

DATA PROCESSING PRINCIPLES

1. Purpose limitation: Personal data may be processed and subsequently used or further communicated only for purposes described in Annex B or subsequently authorised by the data subject.
2. Data quality and proportionality: Personal data must be accurate and, where necessary, kept up to date. The personal data must be adequate, relevant and not excessive in relation to the purposes for which they are transferred and further processed.
3. Transparency: Data subjects must be provided with information necessary to ensure fair processing (such as information about the purposes of processing and about the transfer), unless such information has already been given by the data exporter.
4. Security and confidentiality: Technical and organisational security measures must be taken by the data controller that are appropriate to the risks, such as against accidental or unlawful destruction or accidental loss, alteration, unauthorised disclosure or access, presented by the processing. Any person acting under the authority of the data controller, including a processor, must not process the data except on instructions from the data controller.
5. Rights of access, rectification, deletion and objection: As provided in Article 12 of Directive 95/46/EC, data subjects must, whether directly or via a third party, be provided with the personal information about them that an organisation holds, except for requests which are manifestly abusive, based on unreasonable intervals or their number or repetitive or systematic nature, or for which access need not be granted under the law of the country of the data exporter. Provided that the authority has given its prior approval, access need also not be granted when doing so would be likely to seriously harm the interests of the data importer or other organisations dealing with the data importer and such interests are not overridden by the interests for fundamental rights and freedoms of the data subject. The sources of the personal data need not be identified when this is not possible by reasonable efforts, or where the rights of persons other than the individual would be violated. Data subjects must be able to have the personal information about them rectified, amended, or deleted where it is inaccurate or processed against these principles. If there are compelling grounds to doubt the legitimacy of the request, the organisation may require further justifications before proceeding to rectification, amendment or deletion. Notification of any rectification, amendment or deletion to third parties to whom the data have been disclosed need not be made when this involves a disproportionate effort. A data subject must also be able to object to the processing of the personal data relating to him if there are compelling legitimate grounds relating to his particular situation. The burden of proof for any refusal rests on the data importer, and the data subject may always challenge a refusal before the authority.
6. Sensitive data: The data importer shall take such additional measures (e.g. relating to security) as are necessary to protect such sensitive data in accordance with its obligations under clause II.
7. Data used for marketing purposes: Where data are processed for the purposes of direct marketing, effective procedures should exist allowing the data subject at any time to "opt-out" from having his data used for such purposes.
8. Automated decisions: For purposes hereof "automated decision" shall mean a decision by the data exporter or the data importer which produces legal effects concerning a data subject or significantly affects a data subject and which is based solely on automated processing of personal data intended to evaluate certain personal aspects relating to him, such as his performance at work, creditworthiness, reliability, conduct, etc. The data importer shall not make any automated decisions concerning data subjects, except when:
 - a)
 - i. such decisions are made by the data importer in entering into or performing a contract with the data subject, and
 - ii. the data subject is given an opportunity to discuss the results of a relevant automated decision with a representative of the parties making such decision or otherwise to make representations to that parties.
 - or
 - b) where otherwise provided by the law of the data exporter.
