Section I. Instructions to Offerors

I.1. Introduction

Chemonics, the Buyer, acting on behalf of the U.S. Agency for International Development (USAID) and the Global Health Supply Chain Program – Procurement and Supply Management (GHSC-PSM) project, under contract number AID-OAA-I-15-00004 and Task Order No. AID-OAA-15-00007, AID-OAA-15-00010, and AID-OAA-16-00018 is soliciting offers from companies and organizations to submit proposals to participate with GHSC-PSM to provide chartered air transportation services for project health commodities in Haiti.

The purpose of the GHSC-PSM project is to ensure an uninterrupted supply of health commodities in support of U.S. government-funded public health initiatives around the world. The project provides direct procurement and supply-chain management support to the President’s Emergency Plan for AIDS Relief (PEPFAR), President’s Malaria Initiative (PMI), USAID’s Population and Reproductive Health program (PRH), and USAID’s Newborn, Child and Maternal Health (MCH) program. To support U.S. government-funded global health activities, GHSC-PSM manages an array of health commodity procurement services and provides related systems strengthening technical assistance encompassing all elements of a comprehensive supply chain.

The purpose of this acquisition is to seek a company to provide chartered air transportation for the GHSC-PSM project in Haiti for the purpose of transporting project health commodities across the country, as well as transporting up to two project staff as requested on these flights. These include antiretroviral (ARV), opportunistic infection (OI), laboratory, cholera, and family planning commodities – in support of the PEPFAR, PRH, and MCH programs, which the project routinely distributes across Haiti. Due to the continued deterioration of the security situation in country, including gang activities which cause blockages across roads and passageways, the need for an air transportation option for project distributions is becoming increasingly critical. As such, the GHSC-PSM project is seeking chartered air services (whether by airplane or helicopter) to provide a safe and efficient options for commodity transportation on an as-needed basis when the circumstances in country necessitate air transport due to the inability to move product by road.

3. Cost Proposal

The cost proposal is used to determine which proposals represent the best value and serves as a basis of negotiation before award of a subcontract.

The price of the subcontract(s) to be awarded will be an all-inclusive fixed price. Nevertheless, for the purpose of the proposal, offerors must provide a detailed budget showing major line items as well as a budget narrative. Please refer to Annex 2 for detailed instructions and a sample cost structure.

No profit, fees, taxes, or additional costs may be added after award.

The offerors' cost proposal shall consist of the following two parts:

Part 1: Price of Services

Offerors must prepare and present to Chemonics table(s), in MS Excel, showing their best proposed prices per route for evaluation. Offeror should provide prices per route within their fleet (i.e. per proposed aircraft), both assuming full weight capacity by kg as well as price per kilogram for each proposed aircraft. The anticipated routes are as follows:

1. Port-au-Prince to Cap Haïtien
2. Port-au-Prince to Les Cayes
3. Port-au-Prince to Miragoane
4. Port-au-Prince to Gonaïve

Separate tables should be provided per proposed aircraft type. In addition, separate tables should be provided should pricing differ based on commodity transportation type (for instance cold-chain and non-cold chain) and/or seasonality. The offeror's prices should include all of the offeror's organizational costs. For each pricing table, offerors are to include information on their fleet inventory and specify total cost of transportation from start to end point (one way) per proposed aircraft type, including the volume and/or weight of commodities that can be transported for each itinerary and aircraft. The offeror should also include the number of passengers that can be transported along with the commodities, and any additional cost per passenger on these flights. In addition, the offeror must also include the amount of "free time" for loading and unloading they are offering for each equipment type and destination, as well as any costs for wait time to be incurred after the "free time" is expired (to be provided in 30 minute increments).

While the total price per flight will be used as a ceiling price for the route, based on the information provided by the Offeror, a price per kilogram (weight) will be established in the IQS. Chemonics expects to see a decrease in costs per kilogram (KG) as the quantities increase. Offerors are strongly encouraged at this time to propose and submit their best, most realistic and reasonable prices in response to this RFP.

The price per KG for each destination shall be established in the IQS with the winning offeror(s) and applied when issuing any Sub Task Orders under the IQS.

Offerors should refer to Annex 2 Guide to Creating Cost Proposal and Establishing Prices for further budget preparation guidance. Chemonics will not provide technical assistance to offerors on budget preparation. Offerors are only required to submit table(s) containing prices, along with cost notes and sample routing plan as requested under Part 2 and 3 below. Offerors are not required to submit separate detailed budgets. Chemonics may at any time during the evaluation period, and at its sole discretion, require offerors to submit additional information to further assess and validate offerors' proposed prices for allowability, allocability, and reasonability.

All cost information must be expressed in US Dollars.

No profit, fees, taxes, or additional costs may be added after award. The agreement under which the potential awarded subcontract(s) is financed does not permit the financing of any taxes, VAT, tariffs, duties, or other levies imposed by any laws in effect in the Cooperating Country. The Offeror must not include such Cooperating Country taxes, VAT, charges, tariffs, duties or levies in their cost proposal.

Part 2: Cost Notes

Offerors must prepare and submit cost notes that explain the basis for all proposed prices. For example, if the offeror proposed a \$5/KG route price for an air ambient commodity transportation type, from a certain location to another, the offeror should explain all of the various costs that are included (to transport commodities from point A to point B). Where pricing differs by commodity transportation type or seasonality, offeror should provide specific explanations in the cost notes, as well as note any discounts or sliding scale for large volumes of distribution or mass campaigns of the same. If Chemonics at any time requests additional information from offerors to understand the offerors' proposed prices, the offerors must submit the additional information requested. The offeror's cost notes must provide sufficient detail to allow Chemonics to clearly see and understand the type of costs included in the offeror's proposed tier prices (such as insurance, fuel, labor, maintenance).

I.8 Evaluation and Basis for Award

This RFP will use the tradeoff process to determine best value as set forth in FAR 15.101-1. That means that each proposal will be evaluated and scored against the evaluation criteria and evaluation sub-criteria, which are stated in the table below. Chemonics will award one or more subcontracts to the offeror whose proposal represents the best value to Chemonics and the GHSC-PSM project. Chemonics may award to a higher priced offeror if a determination is made that the higher technical evaluation of that offeror merits the additional cost/price.

Evaluation points will not be awarded for cost, but for overall evaluation purposes of this RFP, technical evaluation factors other than cost, when combined, are considered significantly more important than cost factors. Cost will primarily be evaluated for realism and reasonableness. If technical scores are determined to be nearly equal, cost will become the determining factor.

In evaluating proposals, Chemonics will use the following evaluation criteria and sub-criteria:

I.9 Negotiations

Best offer proposals are requested. It is anticipated that a subcontract will be awarded solely on the basis of the original offers received. However, Chemonics reserves the right to conduct discussions, negotiations and/or request clarifications prior to awarding a subcontract. Furthermore, Chemonics reserves the right to conduct a competitive range and to limit the number of offerors in the competitive range to permit an efficient evaluation environment among the most highly-rated proposals. Highest-rated offerors, as determined by the technical evaluation committee, may be asked to submit their best prices or technical responses during a competitive range. At the sole discretion of Chemonics, offerors may be requested to conduct oral presentations. If deemed an opportunity, Chemonics reserves the right to make separate awards per component or to make no award at all.

I.10 Terms of Subcontract

This is a request for proposals only and in no way obligates Chemonics to award a subcontract. In the event of subcontract negotiations, any resulting subcontract will be subject to and governed by the terms and clauses detailed in Section III. Chemonics will use the template shown in section III to finalize the subcontract. Terms and clauses are not subject to negotiation. By submitting a proposal, offerors certify that they understand and agree to all of the terms and clauses contained in section III.

The Supplier shall not cancel any policies of insurance required hereunder either before or after completion of the work without written consent of Chemonics. Note DBA is reimbursable to the Offeror.

The Subcontractor shall (a) provide, before commencing performance under this Subcontract, such workers' compensation or security as the Defense Base Act (DBA) (42 U.S.C. 1651, et seq.) requires and (b) continue to maintain it until performance is completed. The Subcontractor shall insert, in all lower-tier subcontracts authorized by Chemonics under this Subcontract to which the Defense Base Act applies, a clause similar to this clause imposing upon those lower-tier subcontractors this requirement to comply with the Defense Base Act. DBA insurance provides critical protection and limits on liability. The Subcontractor shall provide a proof of DBA insurance coverage to Chemonics upon request. Chemonics will verify coverage for, at least, projects in high-risk environments and where Chemonics may be providing security.

(b) AIDAR 752.228-3 WORKERS' COMPENSATION (DEFENSE BASE ACT) [Updated by AAPD 22-01- 6-10-22] As prescribed in AIDAR 728.308, the following supplemental coverage is to be added to the clause specified in FAR 52.228-3.

- (1) The Subcontractor agrees to procure DBA insurance pursuant to the terms of the contract between USAID and USAID's DBA insurance carrier unless the Subcontractor has a DBA self-

insurance program approved by the U.S. Department of Labor or has an approved retrospective rating agreement for DBA.

(2) If USAID or Subcontractor has secured a waiver of DBA coverage (See AIDAR 728.305-70(a)) for Subcontractor's employees who are not citizens of, residents of, or hired in the United States, the Subcontractor agrees to provide such employees with worker's compensation benefits as required by the laws of the country in which the employees are working, or by the laws of the employee's native country, whichever offers greater benefits.

(3) The Subcontractor further agrees to insert in all lower-tier subcontracts hereunder to which the DBA is applicable a clause similar to this clause, including the sentence, imposing on all lower-tier subcontractors authorized by Chemonics a like requirement to provide overseas workmen's compensation insurance coverage and obtain DBA coverage under the USAID requirements contract.

The costs of DBA insurance are allowable and reimbursable as a direct cost to this Subcontract.

Before starting work, the offeror must provide Chemonics with a copy of the DBA coverage policy that covers each of its employees.

(c) AIDAR 752.228-7 INSURANCE ON PRIVATE AUTOMOBILES Pursuant to the clause of this Subcontract entitled "Insurance Liability to Third Persons" (AIDAR 752.228-07), if the Subcontractor or any of its employees, consultants, or their dependents transport or cause to be transported (whether or not at Subcontract expense) privately owned automobiles to the Cooperating Country, or if any of them purchase an automobile within the Cooperating Country, the Subcontractor shall, during the period of this Subcontract, ensure that all such automobiles during such ownership within the Cooperating Country will be covered by a paid-up insurance policy issued by a reliable company providing minimum coverage of US\$10,000/US\$20,000 for injury to persons and US\$5,000 for property damage, or such other minimum coverages as may be set by the cognizant Mission Director, payable in U.S. dollars or its equivalent in the currency of the Cooperating Country. (2) Exceptions: (i) The Subcontractor is not required to provide MEDEVAC insurance to eligible employees and their dependents with a health program that includes sufficient MEDEVAC coverage as approved by Chemonics. (ii) The USAID Mission Director through Chemonics, may make a written determination to waive the requirement for such coverage. The determination must be based on findings that the quality of local medical services or other circumstances obviate the need for such coverage for eligible employees and their dependents located at post.

(3) If authorized to issue lower-tier subcontracts, the Subcontractor shall insert a clause similar to this clause in all lower-tier subcontracts that require performance by Subcontractor employees

Section II Background, Scope of Work, Deliverables, and Deliverables Schedule

II.1. Background

The GHSC-PSM project is seeking bids in response to the need for chartered air flights for the transportation of project health commodities within and across Haiti.

The Global Health Supply Chain Program – Procurement and Supply Management (GHSC-PSM) project is in possession of various commodities – including antiretroviral (ARV), opportunistic infection (OI), laboratory, cholera, and family planning commodities – in support of the PEPFAR, PRH, and MCH programs, which the project routinely distributes across Haiti. However, due to the heightened security situation at the port and the roads leading out of Port-au-Prince, distribution activities planned for the 5 northern departments and 4 southern departments of the country have been delayed over the last several weeks.

As background, the project planned its distribution activities to the four departments in the North, Centre, and South departments in February and March 2024, however following several incidents which resulted in road blockages due to gang violence, vehicles are unable to pass through and distributions via road are not currently possible. In addition, distributions to Carrefour have not been possible in recent weeks either. Access by road to the south of the country and Carrefour has been blocked for several years now as it requires passing through the gang-controlled area of Martissant. Previously, to bypass Martissant to reach the south and Carrefour, the project's 3PL transporters utilized a barge that departed from the Autorité Portuaire Nationale (APN) terminal to Terminal Abraham located in Carrefour. However, given recent and continued issues at the port, distributions via waterway have also been disrupted.

Given the situation described above, the project has not been able to deliver products to the north or south of the country for several weeks, with the exception of the Centre department. These involuntarily interruptions are expected to continue, and delays are expected to continue as the security situation escalates. Therefore, in order to avoid these blockages in the future and bypass the roadblocks and challenges at the port, the project is exploring options via air to transport the most urgent commodities to health sites, and is therefore seeking chartered air transportation services via this RFP.

II.2. Scope of Work

The GHSC-PSM project will award firm fixed price sub-task orders to IQS-holder(s) who propose the best value for efficient and optimized routes in response to a request for task-order proposals. Each STO issued under the IQS will contain a transportation plan for pharmaceutical-grade and non-pharmaceutical-grade commodities, which may include medications, HIV/AIDS, family planning, child and maternal health, and other health products as needed, which identifies the volume and/or weights to be delivered, the locations to be delivered to, the agreed date and time of needed flights, product details, and quantities. There will be a packing list for each destination and the number of packages to be delivered. The subcontractor will be responsible for providing a flight manifest (including details of crew, passengers, and cargo onboard) as well as airway bills/bill of lading for each flight. In addition, the subcontractor will provide proofs of delivery (PODs). For PODs, one copy will be signed by GHSC-PSM and the MOH representative at the time of loading on the aircraft. Another identical unsigned copy will be provided and will be signed by the recipient at the arrival location/after landing at the destination. The charter provider will collect this second copy and provide it to GHSC-PSM within 24 hours as part of the deliverables under the subcontract.

The IQS holder will provide the following services.

- Provide site-to-site air shipment of health commodities to the Norther, South, or other departments within Haiti as the need arises. An illustrative list of expected commodities to be shipped can be found in the attached Annex 8. The types and amounts of commodities to be transported will be determined and shared by GHSC-PSM up to 72 hours in advance of transport. GHSC-PSM will include volume and weight of products as well as intended destinations and dates of transportation in each request.
- Ensure that pilot is present and attentive at the time of loading of commodities onto aircraft and confirm that the commodities loaded correspond to the packing list, PODs, and the distribution plan, including number of parcels, dimensions of each package, description of items, packing, gross weight, and pallet labels. In addition, confirm that temperature sensitive cargo is adequately packed on acceptance of commodities at the time of loading onto the aircraft. Discrepancies, damage, or other issues shall be noted and reported immediately.
- Notify GHSC-PSM of any damage or short cargo within 24 hours from acceptance or receipt, note exact details on the receipt or waybill
 - Take pictures to document the extent of the damage
 - Keep all packing materials or pallets until approved by GHSC-PSM, when cargo is damaged during air transport, or follow GHSC-PSM instructions for delivery or return
 - Provide additional supporting information pertinent to any damage or loss within 24 hours of request by GHSC-PSM
- In the event of temperature variations, the 3PL shall provide copies of temperature readings during the transit as applicable.
- PODs shall reflect quantities and package types/sizes of commodities being transported to facilitate uniform documentation.
- Adhere to the World Health Organization (WHO) standards for transporting pharmaceuticals and other health commodities, for vehicle and other equipment requirements, and transporting any pharmaceutical or other waste products to proper disposal points, as these standards are incorporated into the subcontract in annexes: WHO Good Distribution Practices (GDP) for Medical Products (Annex 5), WHO Model Guidance for the Storage and Transport of Time- and Temperature-Sensitive Pharmaceutical Products (Annex 6), WHO Technical Supplements to Model Guidance for Storage and Transport of Time- and Temperature-Sensitive Pharmaceutical Products (Annex 7), country standards, and consultation provided by the GHSC-PSM Project on relevant quality standards, as applicable, provided under Annexes 5 through 7 and found on the WHO website.
- Ensure accuracy of deliverables by delivering the correct products on time, and delivering to the correct destination, as directed by GHSC-PSM in Haiti. In the event that products are not delivered to the correct destination, it is the responsibility of the subcontractor to inform GHSC-PSM, retrieve the product, and make the correct delivery.
- No other commodities originating from entities other than GHSC-PSM shall be transported on the same flight as GHSC-PSM commodities.
- Manage all transport and logistics functions for designated routes, from point of origin to destination, including provision of appropriate modes of transport necessary for efficient delivery.
- Participate in briefings with GHSC-PSM/origin warehouse, flight operator, and receiving entities to discuss and confirm plan and timelines for delivery of products to aircraft, loading, departure, arrival, and handover at arrival destination so there are no delays. To include planning and confirmation between parties of contingencies as necessary.

- Transport pharmaceuticals and other health commodities in such a way so as to ensure that neither the pharmaceuticals nor the commodities can be contaminated.
- Subcontractor will be legally and financially responsible for the commodities during the transportation process and is required to provide insurance on an all risk basis for commodities in its care, custody and control against all loss or damage to products.
- The Subcontractor must continually assess security within the operating environment and communicate all changes or concerns immediately to Chemonics immediately upon occurrence.
- Receive, review, and maintain records of approved, signed documentation provided by GHSC-PSM in Haiti prior to any handling, transportation, or distribution of commodities.
- Ensure documentation provided by GHSC-PSM in Haiti matches the health commodities to be distributed, including number of parcels, dimensions of each package, packing, gross weight, and pallet labels.
- Report and manage any discrepancies encountered en-route to the destination and up to the final point of delivery.
- Deliver products on time and ensure security of products throughout the entire transport process.
- Provide the necessary labor to load the commodities at the point of origin onto the aircraft and unload the commodities at the landing location.
- Have responsibility for the safety and security of its personnel and property, and of the commodities and property in the Subcontractor's custody. Pilots shall be responsible and accountable for the health commodities from the point they are loaded on the aircraft, up to the point they are offloaded and handed over to designated recipient at the landing location, and shall ensure that the products are handed off to the designated recipient and that all the stipulated documentation is completed to demonstrate clear transfer of custody of commodities between the aircraft and the recipient.
- Subcontractor shall be responsible and accountable for the health commodities from the point when they are loaded onto their aircrafts, up to the point they are offloaded at the arrival destination and handed over to the recipient and shall ensure that all stipulated documentation is complete.
- The Subcontractor shall use only own aircraft or commercially available flights for air shipments. The Subcontractor shall not charter any flights specifically for the GHSC-PSM project without written approval from Chemonics.
- Maintain at all times adequate Standard Operating Procedures (SOPs) for all operations and particularly for the operations listed below. If the Subcontractor makes any substantial changes to their SOPs, the Subcontractor shall provide the updated SOPs to Chemonics.
 - a. Order dispatch and delivery
 - b. Training in relation to good distribution practice, regulations, and safety specific to temperature-controlled goods and cold chain
 - c. Security, that covers the full range of security issues related to the distribution of products, lives, and property
 - d. Disaster recovery plan
 - e. Inventory control/cycle count
 - f. Loading and unloading
 - g. Non-cold chain capacity for transportation of all commodities, including temperature controlled goods and pharmaceuticals.
 - h. Pharmaceutical product transportation
 - i. Incident management and reporting

- j. Daily operations reporting
- k. Reverse logistics

For cold chain transportation services, subcontractor shall:

1. Provide personnel with requisite competency level to be able to effectively perform duties related to documentation, take critical decisions related to cold chain activities and their distribution.
2. Provision of appropriate carrier with adequate temperature regulation to convey cold chain commodities and to maintain the temperature within the required range for the duration of the delivery to point of destination.
3. Use temperature monitoring devices using data loggers in every commodity container to effectively monitor storage temperature during the entire delivery period and/or verifiable and acceptable protocols for the temperature monitoring protocols. Submit data loggers' information for recording/documenting temperature readings at beginning, during (every hour during the delivery) and at time of arrival/landing and hand off at destination airport.
4. Records/documentation would be required of temperature readings at beginning, during and final delivery of the commodities at their destination (i.e. SDPs and DHAs).
5. The PODs must be signed indicating receipts of the cold chain commodities in good condition by MOH representative at Port-au-Prince (PAP) airport.

Air freight

Chemonics's Responsibilities consist of the following:

1. Chemonics shall provide a to the Subcontractor a list of commodities to be transported, including volume and weight, and intended destinations, dates, and times of transportation 72 hours in advance of transport.

Annex 2 Guide to Creating a Financial Proposal for a Fixed Price Subcontract

The purpose of this annex is to guide offerors in creating a budget for their cost proposal. Because the subcontract will be funded under a United States government-funded project, it is important that all offerors' budgets conform to this standard format. It is thus strongly recommended that offerors follow the steps described below.

Under no circumstances may cost information be included in the technical proposal. No cost information or any prices, whether for deliverables or line items, may be included in the technical proposal. Cost information must only be shown in the cost proposal.

Step 1: Design the technical proposal. Offerors should examine the market for the proposed activity and realistically assess how they can meet the needs as described in this RFP, specifically in section II. Offerors should present and describe this assessment in their technical proposals.

Step 2: Determine the basic costs associated with each deliverable. Offerors should consider best estimate of the costs associated with each deliverable, which should include labor and all non-labor costs, e.g. other direct costs, such as fringe, allowances, travel and transport, etc.

Step 3: Create a budget for the cost proposal. Each offeror must create a budget using a spreadsheet program compatible with MS Excel. The budget period should follow the technical proposal period. A sample budget is shown on the following page. All items and services must be clearly labeled and include the total offered price. The detailed budget must show major line items, including, for example:

1. Salaries
2. Indirect costs
3. Any other costs applicable to the work
4. DBA – see clause I. 11

All cost information must be expressed in US Dollars.

Step 4: Write Budget Narrative. The spreadsheets shall be accompanied by written notes in MS Word that explain each cost line item and the assumption why a cost is being budgeted as well as how the amount is reasonable. Supporting information must be provided in sufficient detail to allow for a complete analysis of each cost element or line item. Chemonics reserves the right to request additional cost information if the evaluation committee has concerns of the reasonableness, realism, or completeness of an offeror's proposed cost.

If it is an offeror's regular practice to budget indirect rates, e.g. overhead, fringe, G&A, administrative, or other rate, Offerors must explain the rates and the rates' base of application in the budget narrative. Chemonics reserves the right to request additional information to substantiate an Offeror's indirect rates.

Sample Budget

Offerors should provide pricing in the table below accordingly in response to the technical and cost requirements of this RFP.

Aircraft Type:							
	Flights Dropping off Commodities at Destination		Flights Returning with Commodities		Passengers*	“Free Time” Included per departure/arrival destination (in minutes)	Wait time cost to be incurred after expiration of “free time” (cost per 30 minute increment)

In the case that the subcontractor arrives to the destination with the commodities and the MOH representative does not arrive at the site within an hour, the Subcontractor shall notify the GHSC-PSM designated POC to coordinate receipt of commodities, and if no handover is possible, the subcontractor shall fly back to the point of origin (Port-au-Prince airport) with the commodities in tow. The columns on the right-side of this table should be used to project the costs of returning to Port-au-Prince with the commodities remaining on the aircraft.

*If passenger limits are imposed, please provide a description and details of the limitations and when they are applicable.

52.209-5 CERTIFICATION REGARDING RESPONSIBILITY MATTERS

Certification Regarding Responsibility Matters (Apr 2010)

(a)(1) The Offeror certifies, to the best of its knowledge and belief, that—

(i) The Offeror and/or any of its Principals—

(A) Are are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(B) Have have not , within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(C) Are are not presently indicted for, or otherwise criminally or civilly charged by a governmental entity with, commission of any of the offenses enumerated in paragraph (a)(1)(i)(B) of this provision;

(D) Have , have not , within a three-year period preceding this offer, been notified of any delinquent U.S. Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(1) U.S. Federal taxes are considered delinquent if both of the following criteria apply:

(i) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(ii) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(2) Examples.

(i) The taxpayer has received a statutory notice of deficiency, under I.R.C. § 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(ii) The IRS has filed a notice of U.S. Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. § 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(iii) The taxpayer has entered into an installment agreement pursuant to I.R.C. § 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(iv) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(ii) The Offeror has () has not (), within a three-year period preceding this offer, had one or more contracts terminated for default by any U.S. Federal agency.

(2) “Principal,” for the purposes of this certification, means an officer, director, owner, partner, or a person having primary management or supervisory responsibilities within a business entity (e.g., general manager; plant manager; head of a subsidiary, division, or business segment; and similar positions). This Certification Concerns a Matter Within the Jurisdiction of an Agency of the United States and the Making of a False, Fictitious, or Fraudulent Certification May Render the Maker Subject to Prosecution Under Section 1001, Title 18, United States Code.

(b) The Offeror shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(c) A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Offeror’s responsibility. Failure of the Offeror to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Offeror nonresponsible.

(d) Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of an Offeror is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(e) The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Offeror knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

UEI and SAM Registration Guidance

What is an UEI Number?

The Unique Entity Identifier, or the UEI, is the official name of the “new, non-proprietary identifier” that will replace the DUNS number. The UEI will be requested in, and assigned by, the System for Award Management (SAM.gov). Businesses and organizations who receive funding from the US government will have to use a Unique Entity Identifier (UEI) created in SAM.gov. The UEI number helps the USG to identify companies.

Why am I being requested to obtain a UEI number?

U.S. law – in particular the Federal Funding Accountability and Transparency Act of 2006 (Pub.L. 109-282), as amended by section 6202 of the Government Funding Transparency Act of 2008 (Pub.L. 110-252) - make it a requirement for all entities doing business with the U.S. Government to be registered, currently through the System for Award Management, a single, free, publicly- searchable website that includes information on each federal award. As part of this reporting requirement, prime contractors such as Chemonics must report information on qualifying subawards as outlined in FAR 52.204-10 and 2CFR Part 170. Chemonics is required to report subcontracts with an award valued at greater than or equal to \$30,000 under a prime contract and subawards under prime grants or prime cooperative agreements obligating funds of \$25,000 or more, whether U.S. or locally based. Because the U.S. Government uses UEI numbers to uniquely identify businesses and organizations, Chemonics is required to enter subaward data with a corresponding UEI number.

Is there a charge for obtaining a UEI number?

No. Obtaining a UEI number is absolutely free for all entities doing business with the Federal government. This includes current and prospective contractors, grantees, and loan recipients.

How do I obtain a UEI number?

UEI numbers can be obtained online at SAM.gov.

What information will I need to obtain a UEI number?

To request a UEI number, you will need to provide the following information:

- Legal name and structure
- Tradestyle, Doing Business As (DBA), or other name by which your organization is commonly recognized
- Physical address, city, state and Zip Code
- Mailing address (if separate)
- Telephone number
- Contact name
- Number of employees at your location
- Description of operations and associated code (SIC code found at <https://www.osha.gov/pls/imis/sicsearch.html>)
- Annual sales and revenue information

- Headquarters name and address (if there is a reporting relationship to a parent corporate entity)

How long does it take to obtain a UEI number?

The UEI number is issued immediately upon completion of the request process.

Are there exemptions to the UEI number requirement?

There may be exemptions under specific prime contracts, based on an organization's previous fiscal year income when selected for a subcontract award, or Chemonics may agree that registration is impractical in certain situations. Organizations may discuss these options with the Chemonics representative.

What is CCR/SAM?

Central Contractor Registration (CCR)—which collected, validated, stored and disseminated data in support of agency acquisition and award missions—was consolidated with other federal systems into the System for Award Management (SAM). SAM is an official, free, U.S. government-operated website. There is NO charge to register or maintain your entity registration record in SAM.

When should I register in SAM?

While registration in SAM is not required for organizations receiving a grant under contract, subcontract or cooperative agreement from Chemonics, Chemonics requests that partners register in SAM if the organization meets the following criteria requiring executive compensation reporting in accordance with the FFATA regulations referenced above. SAM.gov registration allows an organization to directly report information and manage their organizational data instead of providing it to Chemonics. Reporting on executive compensation for the five highest paid executives is required for a qualifying subaward if in your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs):

- (1) received 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**
- (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; **and**,
- (3) The public have **does not** have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the US Internal Revenue Code of 1986.

If your organization meets the criteria to report executive compensation, the following sections of this document outline the benefits of and process for registration in SAM.gov. Registration may be initiated at <https://www.sam.gov>. There is NO fee to register for this site.

Why should I register in SAM?

Chemonics recommends that partners register in SAM to facilitate their management of organizational data and certifications related to any U.S. federal funding, including required executive compensation

reporting. Executive compensation reporting for the five highest paid executives is required in connection with the reporting of a qualifying subaward if:

- a. In your business or organization's preceding completed fiscal year, your business or organization (the legal entity to which the UEI number belongs) received (1) 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and (2) \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and,
- b. The public have does not have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI number it provided belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986.

What benefits do I receive from registering in SAM?

By registering in SAM, you gain the ability to bid on federal government contracts. Your registration does not guarantee your winning a government contract or increasing your level of business. Registration is simply a prerequisite before bidding on a contract. SAM also provides a central storage location for the registrant to supply its information, rather than with each federal agency or prime contractor separately. When information about your business changes, you only need to document the change in one place for every federal government agency to have the most up-to-date information.

How do I register in SAM?

Follow the step-by-step guidance for registering in SAM for assistance awards (under grants/cooperative agreements) at: https://www.fsd.gov/sys_attachment.do?sys_id=d4d157741ba3c5103565ed3ce54bcb0

Follow the step-by-step guidance for contracts registrations at:
https://www.fsd.gov/sys_attachment.do?sys_id=b4c153341ba3c5103565ed3ce54bcbb8

You must have a UEI number in order to begin either registration process.

If you already have the necessary information on hand (see below), the online registration takes approximately one hour to complete, depending upon the size and complexity of your business or organization.

What data is needed to register in SAM?

SAM registrants are required to submit detailed information on their company in various categories. Additional, non-mandatory information is also requested. Categories of required and requested information include:

- * General Information - Includes, but is not limited to, UEI number, CAGE Code, company name, Federal Tax Identification Number (TIN), location, receipts, employee numbers, and web site address.
- * Corporate Information - Includes, but is not limited to, organization or business type and SBA-defined socioeconomic characteristics.
- * Goods and Services Information - Includes, but is not limited to, NAICS code, SIC code, Product Service (PSC) code, and Federal Supply Classification (FSC) code.

(*Note: EDI Information is optional and may be provided only for businesses interested in conducting transactions through EDI.)
